Key Objectives

- Design and build the backend API for your app using FastAPI.

- Define clear API endpoints and models that power your app's functionality.

- Document and share your demo code with proper comments and instructions.

- Present your app idea and API design in a pitch format.

Refresher - What is FastAPI?

- FastAPI is a modern web framework for building APIs with Python.

- It's fast, intuitive, and based on Python type hints and Pydantic for data validation.

- FastAPI makes it easy to design and document APIs while ensuring high performance.

- You can quickly prototype and build powerful APIs with minimal code.
