

Step-by-Step Explanation

Guide

- Use `input()` to get IP
- Loop 4 times with `for`
- Generate random response time
- Print results with formatting

- `import random`
- `ip = input('Enter IP: ')`
- `for i in range(4):`
 - `delay = random.randint(1,100)`
 - `print(f'Reply from {ip}: time={delay}ms')`
